HOW TO SET UP MOTION DETECTION OVER THE NETWORK FOR DVR SYSTEMS MODEL NUMBERS: QT-Series

STEP 1: Turn on your computer and open Internet Explorer.

STEP 2: In the address bar, enter in the IP address of your DVR (Note: If your WebCam viewer does not fit the internet explorer, right click above the “New Tab” button and disable the different toolbars that may be taking space).
STEP 3: Enter your login information (default user name is “admin” and the default password is “123456”) and click “LOGIN” (If this screen does not appear, see the “ActiveX Controls” guide).

STEP 4: Move the cursor to “CONFIG” and click.
STEP 5: Move the cursor to “Schedule” and click.

STEP 6: Move the cursor to “Motion” under the Schedule menu.
STEP 7: Move the cursor to the pencil button and click. Select which channel you want to schedule recording for.

STEP 8: Click on the days you wish to schedule motion recording for and drag the cursor to set the schedule.
STEP 9: If you wish to copy the motion detection schedule to other channels, select the channel you wish to copy the schedule to and then click “Copy”.

STEP 10: Move the cursor to “Apply” and click.
STEP 11: Move the cursor to “Alarm” and click.

STEP 12: Check the boxes next to the channels you wish to activate motion detection recording for.
STEP 13: Click the “Setting” button under the Trigger column next to the channel you wish to set up motion detection for.

STEP 14: Set which channels you want to record when motion detection has been triggered on the channel you specified in the last step.
